

imageFORCE Series

A NEW ERA IN OFFICE PRINTING

Supporting digital transformation
initiatives through advanced
scan functionality and
cloud-ready capabilities.

TRANSFORM THE WAY YOU WORK

Today's business world is evolving faster than ever before

Changing customer expectations, shifting market trends and the constant disruption that advanced technology brings, are creating new challenges for businesses.

Canon provides a broad range of products and solutions to help businesses achieve greater productivity, reduced costs and more uptime.

MULTIFUNCTION PRINTERS

Be secure and sustainable

With Canon's multifunction printers (MFPs), you can take advantage of tailored user options and advanced security features to deliver more secure and sustainable practices for daily operations.

LASER AND MF PRINTERS

Perfect for home and small offices

Laser desktop printers deliver high-quality prints quickly and efficiently, with a compact design ideal for home and small office use.

Print, copy, fax or scan from the convenience of your own desk.

PRODUCTION PRINTERS

Take control of your print work

Make sure your business flyers, brochures, newsletters and booklets get the attention they deserve.

Enjoy greater control, convenience and improved security with in-house production printing.

INNOVATION AND IMAGINATION

Canon has always been at the forefront of innovation

For the past 42 years we've ranked in the top ten US patent recipients. We have hundreds of researchers in our R&D hubs around the world, working relentlessly to keep us at the heart of innovative technologies with robotics, nano technologies and mixed reality.

Canon supports a wide range of industries through the delivery of efficient, secure and collaborative business solutions.

SCANNING SOLUTIONS

Digitise your documents

Turn your physical archives into digital records and improve accessibility of information, driving productivity for your business and reducing physical storage requirements.

LARGE FORMAT PRINTERS

Bring your plans to life

Develop your plans with quality and speed. With our large format printers, you can scan updates from the project team and deliver detailed documents with the accuracy and precision you need.

CLOUD PRINT SOFTWARE

Cloud-based print management

uniFLOW Online is a simple, secure, serverless, cloud printing and scanning solution for businesses. Increase productivity, control costs and print securely.

DISCOVER imageFORCE

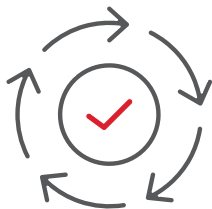

Designed to meet the evolving needs of modern offices, the imageFORCE range delivers the reliability, productivity and innovation businesses rely on.

From everyday printing to high-impact materials, imageFORCE ensures every output represents your best.

imageFORCE PILLARS

Canon's imageFORCE multifunction printers are built on 4 key pillars:

1 CONSISTENT QUALITY FOR EVERY PRINT

Introducing a break-through in OLED technology, Canon's proprietary D² Exposure unit provides 4,800 x 2,400 dpi^{1,2} true optical resolution, ensuring sharp, smooth, high-definition prints even with fine small text and lines, making Production like print quality available to every office.

E² Analysis^{1,2} enhances service reliability by combining Canon's unique algorithms with smart imageFORCE devices and powerful cloud systems.

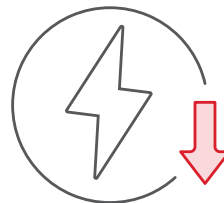

2 ADVANCED INTELLIGENT SECURITY

The imageFORCE Series strengthens security with machine learning derived security assistance that monitors network communication and recommends optimal settings.²

'Verify System at Startup', a secure boot process, verifies firmware and applications, detecting and repairing tampering. Built-in data protection includes drive lock, FIPS 140-3 SSD¹ encryption, and a simple 'Initialize All Data/Settings' function to safely wipe devices before redeployment or removal.

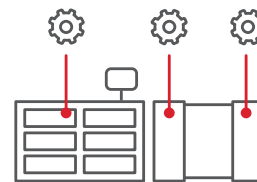

Trellix® Embedded Control ensures only whitelisted code runs, providing protection against rogue software.

3 DRIVING SUSTAINABLE IMPACT

Canon is committed towards sustainability by replacing EPS (Polystyrene packaging) with cardboard and increasing the use of recycle materials across its print portfolio.

Energy Efficiency has also improved through innovations such as low-melting-point toner², On-Demand fixing, real-time motor control, and other low energy technologies, all designed to reduce power consumption without compromising performance.

4 PRODUCTIVITY AND EASE OF USE

The devices enhance productivity with a modern, intuitive interface, automatic paper recognition and Hot Folders for quick, preset printing. Flexible driver options include UFR (Ultra Fast Render), PCL, PostScript and Fiery support.

Users benefit from seamless mobile printing, multiple connectivity options and smooth integration with business platforms such as OneDrive®, SharePoint®, Google Drive®, Dropbox®, Concur® and Microsoft® for document digitisation³.

¹ Independently validated. ² Model dependent. ³ Requires optional Cloud Connector or uniFLOW Online.
